

3. Department of Virology III

- 1) Dong JB, Saito A, Mine Y, Sakuraba Y, Nibe K, Goto Y, Komase K, Nakayama T, Miyata H, Iwata H, and Haga T. Adaptation of wild-type measles virus to cotton rat lung cells: E89K mutation in matrix protein contributes to its fitness. *Virus Genes*. 39: 330-4 (2009)
- 2) Ninomiya K, Katayama T, Fujieda N, Nakayama T, Komase K, Nagata K, and Takeuchi K. Amino Acid substitution at position 464 in the haemagglutinin-neuraminidase protein of a mumps virus Urabe strain enhanced the virus growth in neuroblastoma SH-SY5Y cells. *Vaccine*. 27: 6160-5 (2009)
- 3) Kato S, Ohgimoto S, Sharma LB, Kurazono S, Ayata M, Komase K, Takeda M, Takeuchi K, Ihara T, and Ogura T. Reduced ability of hemagglutinin of the CAM-70 measles vaccine strain to use receptors CD46 and SLAM. *Vaccine*. 27: 3838-48 (2009)
- 4) Nakatsu Y, Takeda M, Iwasaki M, and Yanagi Y. A highly attenuated measles virus vaccine strain encodes a fully functional C protein. *J Virol*. 83:11996-2001 (2009).
- 5) Iwasaki M, Takeda M, Shirogane Y, Nakatsu Y, Nakamura T, and Yanagi Y. The matrix protein of measles virus regulates viral RNA synthesis and assembly by interacting with the nucleocapsid protein. *J Virol*. 83:10374-83 (2009)
- 6) Itoh Y, Ozaki H, Ishigaki H, Sakoda Y, Nagata T, Soda K, Isoda N, Miyake T, Ishida H, Okamoto K, Nakayama M, Tsuchiya H, Torii R, Kida H, and Ogasawara K. Subcutaneous inoculation of a whole virus particle vaccine prepared from a non-pathogenic virus library induces protective immunity against H7N7 highly pathogenic avian influenza virus in cynomolgus macaques. *Vaccine*. 28:780-9 (2009)
- 7) Murakami T, Eda Y, Nakasone T, Ami Y, Someya K, Yoshino N, Kaizu M, Izumi Y, Matsui H, Shinohara K, Yamamoto N, and Honda M. Postinfection passive transfer of KD-247 protects against simian/human immunodeficiency virus-induced CD4+ T-cell loss in macaque lymphoid tissue. *AIDS*. 23: 1485-94 (2009)
- 8) Yasukawa K, Oshiumi H, Takeda M, Ishihara N, Yanagi Y, Seya T, Kawabata S, and Koshiba T. Mitofusin 2 inhibits mitochondrial antiviral signaling. *Sci Signal*. 2. ra47 (2009)
- 9) Yanagi Y, Takeda M, Ohno S, and Hashiguchi T. Measles virus receptors. Griffin DE and Oldstone MBA ed. *Current Topics in Microbiology and Immunology* 329. Measles history and basic biology. 13-30 (2009)
- 10) Ikegame S, Takeda M, Ohno S, Nakatsu Y, Nakanishi Y, and Yanagi Y. RIG-I and MDA5 RNA helicases both contribute to the induction of interferon- α / β in measles virus-infected human cells. *J Virol*. 84:372-9 (2010)
- 11) Meng X, Nakamura T, Okazaki T, Inoue H, Takahashi A, Miyamoto S, Sakaguchi G, Eto M, Naito S, Takeda M, Yanagi Y, and Tani K. Enhanced antitumor effects of an engineered measles virus Edmonston strain expressing the wild-type N, P, L genes on human renal cell carcinoma. *Mol Ther*. 18:544-51 (2010)
- 12) Shirogane Y, Takeda M, Tahara M, Ikegame S, Nakamura T, and Yanagi Y. Epithelial-mesenchymal transition abolishes the susceptibility of polarized epithelial cell lines to measles virus. *J Biol Chem*. 285:20882-90 (2010)
- 13) Chang TH, Kubota T, Matsuoka M, Bray M, Jones S, and Ozato K. Ebola Zaire virus blocks type I interferon production by exploiting the host SUMO modification machinery. *PLoS Pathog*. 5:e1000493 (2009)
- 14) Masumi A, Ito M, Mochida K, Hamaguchi I, Mizukami T, Momose H, Kuramitsu M, Tsuruhara M, Takizawa K, Kato A, and Yamaguchi K. Enhanced RIG-I

- expression is mediated by interferon regulatory factor-2 in peripheral blood B cells from hepatitis C virus-infected patients. *Biochem Biophys Res Commun.* 391:1623-8 (2010)
- 15) Suzuki H, Kidokoro M, Fofana IB, Ohashi T, Okamura T, Matsuo K, Yamamoto N, and Shida H. Immunogenicity of newly constructed attenuated vaccinia strain LC16m8Delta that expresses SIV Gag protein. *Vaccine.* 27:966-71 (2009)
 - 16) Kubota T, Matsuoka M, Chang TH, Bray M, Jones S, Tashiro M, Kato A, and Ozato K. Ebolavirus VP35 interacts with the cytoplasmic dynein light chain 8. *J Virol.* 83:6952-6 (2009)
 - 17) Konno H, Yamamoto T, Yamazaki K, Gohda J, Akiyama T, Semba K, Goto H, Kato A, Yujiri T, Imai T, Kawaguchi Y, Su B, Takeuchi O, Akira S, Tsunetsugu-Yokota Y, and Inoue J. TRAF6 Establishes Innate Immune Responses by Activating NF- κ B and IRF7 upon Sensing Cytosolic Viral RNA and DNA. *PLoS ONE.* 4:e5674 (2009).
 - 18) Matsuyama S, and Taguchi F. Two step conformational changes mediated by receptor binding and proteolysis of a coronavirus envelope glycoprotein. *J Virol.* 83: 11133-41 (2009)
 - 19) Shirato K, and Mizutani T. ZhiFeng and Ming Long (ed.). Replication, Transcription, and Translation of Coronaviruses. *Viral Genomes: Diversity, Properties and Parameters.* Nova Science Publishers, Inc., New York, USA. p159-67 (2009)
 - 20) Mizuta K, Matsuzaki Y, Hongo S, Ohmi A, Okamoto M, Nishimura H, Itagaki T, Noriko, Katsushima H, Oshitani K, Suzuki A, Furuse Y, Noda M, Kimura H, and Ahiko T. Stability of the seven hexonhypervariable region sequences of adenovirus types 1-6 isolated in Yamagata, Japan between 1988 and 2007. *Virus Res.* 140: 32- 40 (2009)
 - 21) Nakamura M, Itokazu K, Taira K, Kawaki T, Kudaka J, Nidaira M, Okano S, Koja Y, Tamanaha K, Kimura H, and Noda M. Genotypic and phylogenetic analysis of the G gene of respiratory syncytial virus isolates in Okinawa, Japan, 2008. *Jpn. J Infect Dis.* 82:326-7 (2009)
 - 22) Hishinuma-Igarashi I, Mizuta K, Saito Y, Ohuchi Y, Noda M, Akiyama M, Sato H, Tsukagoshi H, Okabe N, Tashiro M, and Kimura H: Phylogenetic analysis of human bocavirus (HBoV) detected from children with acute respiratory infection in Japan. *J Infect.* 58:311-3 (2009).
 - 23) Mizuta K, Hirata A, Suto A, Aoki Y, Ahiko T, Itagaki T, Tsukagoshi H, Morita Y, Obuchi M, Akiyama M, Okabe N, Noda M, Tashiro M, and Kimura H. Phylogenetic and cluster analysis of human rhinovirus species A (HRV-A) isolated from children with acute respiratory infections in Yamagata, Japan. *Virus Res.* 147:265-74 (2010).
 - 24) Toda S, Kimura H, Noda M, Mizuta K, Matsumoto T, Suzuki E, and Shirabe K. Phylogenetic analysis of human metapneumovirus from children with acute respiratory infection in Yamaguchi, Japan during summer 2009. *JpnJ Infect Dis.* 63:139-40 (2010)
 - 25) Chaipan C, Kobasa D, Bertram S, Glowacka I, Steffen I, Tsegaye TS, Takeda M, Bugge TH, Kim S, Park Y, Marzi A, and Pöhlmann S. Proteolytic activation of the 1918 influenza virus hemagglutinin. *J Virol.* 83:3200-11. (2009)
