

## **16. Division of Experimental animal Research**

- 1) Taguchi F, Hirai-Yuki A : Mouse Hepatitis Virus Receptor as a Determinant of the Mouse Susceptibility to MHV Infection. Frontiers in Microbiology. 68: 1-4. 2012
- 2) Fujisawa K, Nakajima R, Jinna M, Hirata H, Zamoto Niikura A, Kawabuchi Kurata T, Arai S and Ishihara C : Intron sequences from the CCT7 gene exhibit diverse evolutionary histories among the four lineages within the *Babesia microti* group, a genetically related species complex that includes human pathogens. Japanese journal of infectious diseases. 64.403-410. 2011
- 3) Suzuki O, Kanai T, Nishikawa T, Yamamoto Y, Noguchi A, Takimoto K, Koura M, Noguchi Y, Uchio-Yamada K, Tsuji S, Matsuda J : Adult onset cardiac dilatation in a transgenic mouse line with Gal  $\beta$  1,3GalNAc  $\alpha$  2,3-sialyltransferase II (ST3Gal-II) transgenes: a new model for dilated cardiomyopathy. The Proceedings of the Japan Academy, Series B. 87: 550-562. 2011
- 4) Li TC, Yoshimatsu K, Yasuda SP, Arikawa J, Koma T, Kataoka M, Ami Y, Suzuki Y, Mai le TQ, Hoa NT, Yamashiro T, Hasebe F, Takeda N, Wakita T : Characterization of self-assembled virus-like particles of rat hepatitis E virus generated by recombinant baculoviruses. J Gen Virol. 92:2830-7. 2011
