

11. Department of Medical Entomology

- 1) Hirabayashi, K., Takeda, M., Tsuda, Y. Two-year after effects of Tsunami on abundance of mosquitoes in suburban Sendai area in Miyagi Prefecture, Japan in 2013. *Bulletin of Entomological Research*, 31: 27-31, 2015.
 - 2) Tanikawa, T., Yamauchi, M., Ishihara, S., Tomioka, Y., Kimura, G., Tanaka, K., Suzuki, S., Komagata, O., Tsuda, Y., Sawabe, K. Operation note on dengue vector control against *Aedes albopictus* in Chiba City, Japan, where an autochthonous dengue case was confirmed in September 2014. *Medical Entomology and Zoology*, 66: 31-33, 2015.
 - 3) Chen, T.H., Aure, W.E., Cruz, E.I., Malbas Jr, F.F., Teng, H.J., Lu, L.C., Kim, K.S., Tsuda, Y. Shu, P.Y. Avian *Plasmodium* infection in field-collected mosquitoes during 2012-2013 in talac, Philippines. *Journal of Vector Ecology*, 40: 386-395, 2015.
 - 4) Kim, K.S., Tsuda, Y. Sporogony and sporozoite rates of avian malaria parasites in wild *Culex pipiens pallens* and *C. inatomi* in Japan. *Parasites & Vectors*, 8: 633-637, 2015.
 - 5) Hellgren, O., Atkinson, C.T., Bensch, S., Albayrak, T., Dimitrov, D., Ewen, J.G., Kim, K.S., Lima, M.R., Martin, L., Palinauskas, V., Ricklefs, R., Sehgal, R.N.M., Valkiūnas, G., Tsuda, Y., Marzal, A. Global phylogeography of the avian malaria pathogen *Plasmodium relictum* based on MSP1 allelic diversity. *Ecography*, 38: 842-850, 2015.
 - 6) Heo, C.C., Latif, B., Kurahashi, H., Hayashi, T., Nazni, W.A., Omar, B. Coprophilic dipteran community associated with horse dung in Malaysia. *Halteres*, 6: 33-50, 2015.
 - 7) Hoshino, K., Isawa, H., Kuwata, R., Tajima, S., Takasaki, T., Iwabuchi, K., Sawabe, K., Kobayashi, M., Sasaki, T. Establishment and characterization of two new cell lines from the mosquito *Armigeres subalbatus* (Coquillett) (Diptera: Culicidae). *In Vitro Cellular and Developmental Biology Animal*, 51: 672-679, 2015.
 - 8) Sasaki, T., Higa, Y., Bertuso, A.G., Isawa, H., Takasaki, T., Minakawa, N., Sawabe, K. Susceptibility of indigenous and transplanted mosquito spp. in Japan to dengue virus. *Japanese Journal of Infectious Diseases*, 68: 425-427, 2015.
 - 9) Gillich, N., Kuwata, R., Isawa, H., Horie, M. Persistent natural infection of a *Culex tritaeniorhynchus* cell line with a novel *Culex tritaeniorhynchus* rhabdovirus strain. *Microbiology and Immunology*, 59: 562-566, 2015.
 - 10) Ejiri, H., Lim, C.K., Isawa, H., Kuwata, R., Kobayashi, D., Yamaguchi, Y., Takayama-Ito, M., Kinoshita, H., Kakiuchi, S., Horiya, M., Kotaki, A., Takasaki, T., Maeda, K., Hayashi, T., Sasaki, T., Kobayashi, M., Saijo, M., Sawabe, K. Genetic and biological characterization of Muko virus, a new distinct member of the species *Great Island virus* (genus Orbivirus, family Reoviridae), isolated from *Ixodid* ticks in Japan. *Archives of Virology*, 160: 2965-2977, 2015.
 - 11) Kuwata, R., Isawa, H., Hoshino, K., Sasaki, S., Kobayashi, M., Maeda, M., Sawabe, K. Analysis of mosquito-borne flavivirus superinfection in *Culex tritaeniorhynchus* (Diptera: Culicidae) cells persistently infected with *Culex* flavivirus (Flaviviridae). *Journal of Medical Entomology*, 52: 222-229, 2015.
 - 12) Itokawa, K., Komagata, O., Kasai, S., Tomita, T. A single nucleotide change in a core promoter is involved in the progressive overexpression of the duplicated *CYP9M10* haplotype lineage in *Culex quinquefasciatus*. *Insect Biochemistry and Molecular Biology*, 66: 96-102, 2015.
 - 13) Ogawa, K., Komagata, O., Hayashi, T., Itokawa, K., Morikawa, S., Sawabe, K., Tomita, T. Field and laboratory evaluations of the efficacy of DEET repellent against *Ixodes* ticks. *Japanese Journal of Infectious Diseases*, Epub 2015/06/16. doi: 10.7883/yoken.JJID.2015.038, 2015.
 - 14) Scott, J.G., Yoshimizu, M., Kasai, S. Pyrethroid resistance in *Culex pipiens* mosquitoes. *Pesticide Biochemistry and Physiology*, 120: 68-76, 2015.
